

Daniel Olliver

Full-Stack Developer · Auckland, NZ

daniel@danielolliver.com · danielolliver.com/dev · github.com/dwatces · linkedin.com/in/danielolliver · 021 069 9543

PROFILE

Full-stack developer with a Postgraduate Certificate in AI from the University of Auckland and a track record building production web applications. Comfortable across the stack — REST APIs and data pipelines through to React frontends and cloud deployment — and owning features end to end in small, fast-moving teams. Builds with modern AI tooling, including Claude Code agent pipelines, and applies it practically across development workflows.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript, React, Node.js, Express, TypeScript, Next.js, Vite, Python
Backend & Data	REST API design, Supabase (PostgreSQL), MongoDB, Stripe, Facebook Ads, third-party API integration
Platforms & Tooling	WordPress (themes, hosting, DNS, GA4/GTM), Cloudways, AWS, Claude Code CLI (agent pipelines, hooks, memory)
Practice	Git, Jira, Postman, Agile & sprint cycles, code review

EXPERIENCE

Freelance Full-Stack Developer · Contract / Remote

2024 – 2026

- Built and delivered an ADHD patient-assessment platform for a UK health provider over a three-month contract — React frontend, Node/Express backend, Supabase (PostgreSQL) for patient data, deployed to production under strict reliability requirements.
- Migrated a Dunedin tour operator's website (backtonaturetours.co.nz) to a client-editable Webflow CMS — native + CMS build (Tours & Testimonials), FareHarbor booking integration, and a full SEO migration (preserved URLs, 301 redirects, structured data).
- Developed and maintained WordPress sites for international clients: hosting, DNS, CRM integrations, GA4/GTM analytics, and form-to-CRM pipelines.
- Integrated Stripe payment flows and Facebook Ads pixels across multiple e-commerce projects; managed ongoing maintenance, performance, and third-party API work across a diverse client base.

Graduate Teaching Assistant · University of Auckland

Mar – Jun 2024

- Supported COMPSCI 719 (Programming with Web Technologies): tutorials and one-on-one mentoring across HTML, CSS, JavaScript, server-side frameworks, and database fundamentals.
- Worked with students at varying technical levels, translating complex concepts clearly under time pressure.

Junior Developer · 3PM

Feb 2022 – Jan 2024

- Delivered a React/Node.js resource-scheduling platform for construction trades under a three-month contract — performed well enough to be brought on full-time.
- Contributed to production MERN applications in an Agile team with sprint cycles, code reviews, and cross-functional collaboration.

Intern Full-Stack Developer & Scrum Master · OutPace

Mar – Nov 2021

- Designed and built a responsive full-stack application working directly with company directors.
- Led Agile ceremonies — standups, sprint retrospectives, weekly demos — ensuring consistent delivery against stakeholder expectations.

EDUCATION

Postgraduate Certificate in Artificial Intelligence · University of Auckland · 2024

Computational intelligence, machine-learning architecture, and AI systems; independent research into novel neural-network architectures.

Bachelor of Computer and Information Sciences · Auckland University of Technology · 2021
